

**IMPORTANT NOTE:**

Due to an extreme increase in the cost of parts, components and raw materials, we were forced to increase our prices by 10% from 10 July 2021. You have to add 10% to all prices in this price list. Prices in the configurator.azub.eu are correct. A deeper explanation can be found at our web page.

Dear customers, friends and fans of recumbents,

A year ago, you were reading these lines and learning that we were looking forward to the 20th anniversary celebrations of our company's founding which were meant to take place at the SPEZI (Special Bike Show) show in Germany, Recumbent Cycle Con in USA and, above all, during our great Recumbent Meeting in Uherský Brod. Alas, it was not to be, as the whole world was faced with a global pandemic. Neither SPEZI nor RCC took place and we were only just able to organize our Recumbent Meeting, with a very limited number of participants.

For 2021 we wish for everything to settle down and for life to return to normal. Well, at least a kind of normal. It would be better still if we were able to meet you at trade fairs or other recumbent events. Because both SPEZI and RCC have been planned for the end of the year, we have a lot of work to do in the meantime. The situation on the bicycle market is highly unstable. The failure in production at the beginning of 2020 and the ensuing huge demand for anything with pedals caused problems in the supply of parts and delivery times often had to be extended many times over. We try to be as prepared as possible, we have a large number of parts in stock or ordered, and we will work very hard on delivering your bikes on time. Keep your fingers crossed for us!

## HOW TO ORDER

The best and easiest way to put an order in is to contact one of our dealers. There are almost 80 all over the world and they will be happy to help you pick and order the right model for you. The same applies if you are just looking for some accessories or spare parts. Alternately, you can contact our sales department directly, we will be happy to help with any inquiry.

The best way to configure your bike is to visit our configurator at [configurator.azub.eu](http://configurator.azub.eu), where you can also place your order. Please, don't forget to enter your height and weight as well as any additional special requests you may have.

Well, that's about it for now, we hope you enjoy working with our price list!

Your AZUB team

## **The Colour Power**

For the new season, we have got some new additions for you that could be summed up as "The Colour Power". The reason is simple. We have expanded our optional extra colour portfolio by several new shades, added the most powerful of the Shimano motors and in addition, the CORE level trikes can now be ordered in two shades. Plus, there is also a new flag to brighten up your ride.

Let's explore some items closer.

## **Shimano Steps EP8**

The long-awaited top-class set of Shimano electric drives has finally been launched and we are including it in the offer for the 2021 season, as standard in our ADVANCED Level customization. You will therefore be able to deck out your bike with a motor achieving up to 85 Nm torque, and combine it with any shifting system from our offer. The EP8 will be available not only with a classic derailleur but also with the electronic (automatic) Shimano Nexus Inter E5 gear hub, the Enviolo TR hub with continuously variable transmission or the 14-speed German engineering marvel of a rear hub Rohloff.

## **Battery capacity up to 630 Wh**

As standard, our e-bikes are equipped with the Shimano Steps battery with a capacity of 504 Wh. However, in the new year we are also bringing a larger battery with an impressive capacity of 630 Wh. In ideal conditions it could give you a range of nearly 200 km/120 miles though in most cases, it is around 120 km/75 miles. Still, it is a tremendous increase in capacity and we are really excited about its potential.

## **New colors**

One can never have enough color. After all, colors make the world around us even more beautiful and cheerful, which is why we like to expand our portfolio of color finishes. In addition to the options from our ColorShop, which are virtually unlimited, we have added several new colors in the standard price list and the configurator. They are some popular ColorShop pearl options - Pearl Opal Green metallic, Pearl Light Grey metallic and Pearl Night Blue, as well as a vivid high visibility color Neon Pink shiny, for those who love to be noticed. A unique option is the special Ruby Red Glitter that does not even have its own RAL number! Nevertheless, the most popular color of all AZUB options is still the Black Deep Matt, resembling stealth aircraft.

## **CORE level trikes**

We are glad to see a lot of interest in our CORE level tricycles that come with a predetermined specification and faster delivery. That is why we are making a change for this year in terms of the colour choice. All CORE level trikes can be ordered either in Black Deep Matt or a bright Neon Yellow shiny. We have also slightly changed the specifications. Ti-FLY 26 now has Shimano 3x9 and T-Tris 26 disc brakes instead of drum brakes.

## **AZUB Safety flag Premium**

Our new safety flag is much larger, in a combination of bright green and white for maximum visibility during the day and reflective details, including a free-hanging fluttering reflective strip. What is more, we have improved the flag pole, it is now more durable and easier to handle.

In the price list, you will also find the popular Multi Mount for use on both the right and left side, as well as a spare battery in case you want to double your range. Note that this battery is not attached to the frame and you must carry it in a bag.

We hope you like the changes in our price list and that choosing your new bike will be all the more pleasant for you.

Your AZUB team

# CONDITIONS

## PRICES

All prices include VAT (21%). The AZUB recumbents are tax free (rate of duty) in export to European Union.

## SHIPPING

In person or by courier in a large size box (Perfectly adjusted, 95% assembled). No special tool needed. No technical skills needed.

## SHIPPING COST

Transport cost within EU is included in the price. (Valid only for complete bikes and frame sets).

Contact us for rates when shipping outside EU.

Special fee of 130 EUR applies to all e-bikes shipped outside the EU incl. Canada because of battery which has to be shipped separately as dangerous goods.

## PAYMENT

We accept bank transfer and credit card payment only. Orders have to be prepaid.

## VALIDITY

Valid from February 1, 2021

## NOTE

The components, assembly and colours may deviate from pictures and descriptions due to manufacturers and technical progress.

## NOTE 2

Due to the uncertain situation with the supply of components throughout the cycling industry, some bikes may be delivered in slightly different specifications than those described in this price list, on our website, or in the configurator.

## CHOOSE THE BEST OPTION FOR YOU

We have been building our bikes precisely according to our customers' requirements since the founding of our company. That's the way we keep doing our job up to these days. You can order bike from us either as a frame set to be equipped by yourself, or there are three different options –we call them levels – available for building your bike. It's just up to you if you choose the best-selling configuration that can be delivered within one week, if you configure your new bike with components from a preset group – this way we can finish your bike in 5 to 6 weeks, or if you come up with a totally personalized configuration.

## START BUILDING YOUR BIKE WITH US!

### CORE LEVEL

**Best-selling trike configuration with great price–performance ratio. You choose the accessories for your new trike.**

*Delivery time: 2 weeks*

We have selected a set of components that we consider most suitable for the majority of AZUB riders. Our aim was to offer a well-equipped and durable trike with a very short delivery time so that you can start riding almost immediately. You can choose accessories for your new trike. The two-weeks delivery time corresponds with the time of transport and potential customs declaration.

We offer the T-Tris 26, TRIcon 26 and Ti-FLY 26 in the CORE LEVEL.

### ADVANCED LEVEL

**Configure your dream bike to your taste and select from the parts we have tried and are always on stock. Choose your color and accessories.**

*Delivery time: about 6 weeks*

On the second level of our customer solutions service, you configure your bike to suit your needs. It is easy to get along with the process. You'll find your way through our quite big offer thanks to a description of each option that you find upon clicking on the image of your chosen part in our configurator. In any case, we are happy to help with the best combinations of your chosen components. We only need to know how often and in what conditions you are most likely to use your bike. We have the vast majority of components on stock, which allows us to build your bike in reasonable time. We can also guarantee our prices throughout the year. Our favorite Color Shop is available at this level as well.

### EPIC LEVEL

**Unleash your fantasy and let us build a really unique bike for you.**

*Delivery time: depending on the availability of selected parts*

In case you didn't choose within the offer of the CORE LEVEL we are ready to cooperate with you and come up with a configuration that will completely meet your requirements. However, it is necessary to restrict your choices according to compatibility of components with the design of our bikes as well as the components' accessibility for us. Get in touch with your dealer or directly with us. Together we can prepare the most suitable bike configuration for you. As the next step, we will check on the availability and price of each component, verify compatibility (if possible), determine the approximate delivery time and calculate the price for you. The overall price will include an additional charge for the highly personal approach and will also reflect the time needed for ordering individual components, surcharges for shipping of the components and higher time demands of the building process. The additional charge will be between 50 to 500 EUR/USD. The EPIC LEVEL configuration requires a thorough preparation and your cooperation in the components selection process. Be prepared for busier email communication. Unpredictable situations can arise in the course of the building process itself. For example, a supplier can change a certain part's specification or postpone its delivery. Anyway, you can be sure that we are ready to provide you with the best service possible. The best time to order a bike within the third level configuration is in autumn when we can devote much time to such unique projects. However, you can act out your fantasies even in summer.

**What desires are we able to satisfy?**

There is a vast list of components that we have a lot experience with (see the web page). We are quite sure that we can deliver them and install correctly. We don't want to hinder your fantasy though, and thus feel free to get in touch with any special demands. Before doing this, go through the list of components we are not able to offer.

**What are we not able to provide?**

Unfortunately, it is quite a big range of components, we are not able to supply like: Campagnolo and MicroShift components, Open cockpit steering, Enviolo Automatiq, Bosch e-assist or any other e-assist, pedal brake, belt drive, hard shell seat for our trikes, travel case for our trikes and bikes, different color for red anodized parts.

## CORE LEVEL TRIKES

**Price on the page:** 17

## Great fun and maximum comfort

E-bikes rule the world nowadays. We have also succumbed to their temptation. We perceive e-bikes basically as a means for promoting cycling, be it for leisure or to economize on time when commuting in cities. E-bikes don't just add to the ways you can enjoy your leisure time, they can also bring new qualities to your working days. And that's amazing about them.

For the 2021 season, we have two motors for you to choose for your future bike. Both are from a globally renowned manufacturer of cycling components as well as a time-proven and innovative manufacturer of electric motors for all types of bicycles. Of course, it is none other than Japanese Shimano.

### Shimano Steps E6100

The basic drive unit we offer for many of our models is the tried and tested Shimano Steps E6100 set, commonly used for trekking bikes. Its power of up to 500 W (250 W nominal power) and up to 60 Nm torque is sufficient to conquer even very steep hills with your assistance. Together with the new Shimano battery with 630 Wh capacity, this set could cover a range of more than 200 km / 125 miles. And that makes for a pretty long ride!

#### TECH TALK

**Power:** 250 W

**Torque:** 60 Nm

**Battery capacity:** 504 Wh or 630 Wh

**Range:** up to 170 km / 75 miles (504 Wh)  
or over 200 km / 125 miles (630 Wh)

**Chain wheel 20":** 44 teeth

**Chain wheel 26":** 38 teeth

### Shimano Steps EP8

If your heart runs wild and you tend to leave your sensible side at home, you will enjoy this motor. This top Shimano model is truly full of energy which you will be able to see especially during challenging ascents or in rough terrain where you will really appreciate its brutal torque. But no fear – the intelligent control unit can make your ride very smooth indeed even when you make use of the maximum torque of the terrific 85 Nm. The EP8 certainly offers a proper and never-ending electrifying fun.

#### TECH TALK

**Power:** 250 W

**Torque:** 85 Nm

**Battery capacity:** 504 Wh or 630 Wh

**Range:** up to 120 km / 105 miles (504 Wh)  
or over 150 km / 94 miles (630 Wh)

**Chain wheel 20":** 44 teeth

**Chain wheel 26":** 38 teeth

## Both Shimano motors can be combined with selected components:

### Shimano Nexus Inter 5E Di2 electronic shifting

A gearbox integrated in the rear hub, offering a 263 % range, specially designed for electric bikes to prevent problems with the massive combined torque coming from the rider's feet and the motor. Thanks to the electronic shifting, you can change gears manually or enjoy the convenience of intelligent automatic shifting, savour the ride in itself and the beauty around you, not worrying about anything else. Another huge advantage is the option to change gears even when stationary, which applies to all the other integrated gearboxes anyway, such as Nexus, Rohloff and Pinion.

### Shimano Sora 1x9, or Shimano Deore 1x10

Traditional shifters using a derailleurs and a 11 to 34, or 11 to 36 tooth cassettes, they are the basic economical option we have on offer.

### Enviolo 380 (formerly known as NuVinci)

A continuously variable rear hub transmission, originally designed for industrial electric motors, so its use for electric bikes is, unsurprisingly, possibly the best choice. NuVinci will allow you to change gears even when shifting under power, that is when the motor is putting the power in and you will never have the feeling that it is under stress. Compared to the automatic Nexus Inter E5, the range of gears this option offers is larger by 1/3, that makes it 380 % that will allow you to get up even steeper hills under heavier loads.

### Rohloff - 14 speed gear hub

In comparison with other shifting systems for electric bikes, the Rohloff offers you a massive gear range of 526 %. With this, you will be able to get up any hill under any load. No steep part will pose a problem when moving off even if you have, for example, your huge canine friend behind you in a trailer. The Rohloff is simply the ultimate choice for extreme cyclists favouring electric bikes.

# HOW TO CHOOSE THE SIZE OF THE SEAT?

## BIKE SEATS

Choosing a seat for a recumbent bike is easy as the decisive factor is the rider's height.

**Size M** - up to 175 cm / 5' 8"

**Size L** - from 175 cm to 187 cm / from 5' 8" to 6' 1"

**Size XL** - above 187 cm / above 6' 1"

## TRIKE SEATS

### Size M

An M size seat is suitable for shorter riders or for children.

The recommended maximum height of the rider is 170 cm / 5' 7".

The back part of this seat is 5 cm shorter and the seat is 3 cm narrower than our standard size seat (L).

### Size L

The L sized seat is our most versatile option suitable for the vast majority of riders.

We recommend this seat for riders who are at least 170 cm / 5' 7" tall, there is no maximum limit.

The seat is slightly curved at the top and together with the mesh cover it gives proper support even to very tall riders.

### Size XL

Our largest seat is based on the design of the L size seat, however, this seat is 5 cm / 2" wider than the L size. In addition, the sitting part is 5 cm / 2" longer. This means that when the seat is fitted, it sits 5 cm / 2" higher than our standard L size, allowing for easier getting on and off.

Correspondingly, the handlebars are also wider to allow good manoeuvrability.
